

Tommy Paolma

Computer Engineering Student · Aspiring Software Engineer

tpaolma@gmail.com · github.com/toms1010 · linkedin.com/in/tommy-paolma-65663b341

SUMMARY

Computer Engineering student building practical web applications, event management systems, and embedded projects. Experienced in shipping live tools used at real events, competing in C Programming at ICPEP, and mentoring peers in Arduino and programming fundamentals.

EDUCATION

Bachelor of Science in Computer Engineering — in progress

Focus: software development, hardware-software integration, engineering problem-solving.

SELECTED PROJECTS (SOLE DEVELOPER)

- JDAJNSH school website — consultant/software developer on a team-built Student Code of Conduct site (HTML, CSS, JS).
- MARPOL Ocean Adventure — educational marine-awareness site with study resources and browser games (HTML, CSS, JS).
- Battle of Bands Registration — online registration with organized real-time entries (Google Apps Script, HTML, CSS, JS).
- Pre-Event Registration — pre-registration with email confirmation and QR codes.
- Participant Rating — real-time committee scoring with instant score calculation.
- Sports Event Manager — schedules, teams, and live scoreboards.
- T-Shirt & Cap Order Systems — size, quantity, and payment tracking.
- Campus Navigation — venue map with directions and hall info.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, C#, SQL, R, JavaScript

Web: HTML, CSS, Google Apps Script, responsive design

Embedded: Arduino, sensors, hardware programming basics

Other: Git, GitHub, Google Cloud fundamentals, cybersecurity fundamentals

CERTIFICATIONS (18)

Python · Web Development · C# · Java · R · SQL · Data Science · Data Visualization · Google Cloud · Cybersecurity Fundamentals · Ethical Hacking · Cyber Hygiene · System Configuration · Hardware & Setup · Aviation Technology.

ACTIVITIES & LEADERSHIP

- ICPEP — C Programming competitor (live problem-solving + technical Q&A).
- Arduino & programming workshops — mentored fellow students hands-on.
